

MIFID II product governance / Retail investors, professional investors and ECPs – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties, professional clients and retail clients, each as defined in MiFID II; and(ii) all channels for distribution to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Notes to retail clients are appropriate - investment advice, and portfolio management, and non-advised sales and pure execution services, subject to the distributor's suitability and appropriateness obligations under MiFID II. The product is incompatible for any client outside the positive target market identified above. Any person subsequently offering, selling or recommending the Notes (a distributor) should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

Most material risk factors pertaining to the Guarantor

The key risks with regard to Natixis' structure and operations are set out below:

1. Natixis is exposed to the credit risk of its counterparties in its activities. Due to the inability of one or more of its counterparties to comply with its contractual obligations and in a context of increasing defaults by its counterparties, Natixis could suffer financial losses of a greater or lesser magnitude depending on the concentration of its exposure to those defaulting counterparties;
2. Financial markets' fluctuations and high volatility may expose Natixis to the risk of losses in relation to its trading and investment operations;
3. If Natixis fails to comply with applicable laws and regulations, Natixis could be exposed to heavy fines and other administrative and criminal sanctions likely to have a material adverse impact on its financial position, business and reputation;
4. Natixis is exposed to risks related to the environment in which it operates, and the COVID19 pandemic might have a significant negative impact on its financial and economic environment, which could adversely affect its financial position, its results and more generally its activity; and
5. In the context of its insurance activities, Natixis is exposed mainly to asset impairment risk (fall in the equity or real estate market, widening spreads, interest rate hikes) as well as the risk of lower interest rates which would generate insufficient income to meet its guaranteed principal and returns.

What are the key risks that are specific to the securities?

There are also risks associated with the Notes, including a range of market risks, including:

General risks

(Risk of volatility of the Notes) Noteholders could face a risk of volatility, which refers to the risk of changes in the value of a Note, as well as any difference between the valuation level and the sale price of the Notes on the secondary market. Events in France, Europe or elsewhere could cause volatility in the secondary market of the Notes, and the resulting volatility could have a negative impact on the trading or sale price of the Notes.

(Risk relating to the Natixis Guarantee (which include reference to resolution or insolvency risk of the Guarantor)) Noteholders may suffer losses should the Guarantor undergo resolution proceedings pursuant to European regulation and French transposition rules establishing a framework for the recovery and resolution of credit institutions and investment firms. In case of resolution proceedings, the noteholders could face non-redemption or redemption at an amount lower than the amount expected.

(Risk of early redemption in the event of illegality or changes in taxation) In the event of redemption of the Notes before maturity in the event of illegality or changes in rules on withholding taxes, or a force majeure event the noteholders will receive an amount equal to their fair market value in the event of redemption prior to maturity. The fair market value payable in the event of early redemption may be lower than the amount that they initially anticipated.

(Risk of loss of capital for Notes whose redemption amount is determined by reference to a calculation formula and/or linked to an underlying asset) The amounts of principal payable by the Issuer are indexed on or linked to the performance of the Underlying. Such amounts may be determined by the application of a calculation formula and one or more observations or the occurrence of certain events in relation to the Underlying. If there is an adverse change in the performance of the

Underlying, exacerbated, if relevant, by the terms of the above-mentioned formula or indexation provisions, investors may suffer a significantly decreased redemption amount on the Notes or even a total loss of its investment.

(Currency fluctuations and exchange controls risk) Currency fluctuations and exchange controls can have a substantial impact on the value of the Notes. Consequently, it is possible that, following a disruption in the source of the price or a substantial fluctuation in exchange rates, there could be a decrease in the return on the Notes or the redemption amount after conversion into the investor's currency.

(Risk of low or no returns) The amounts of interest payable by the Issuer are indexed on or linked to changes in the Underlying(s). Such amounts may be determined by the application of a calculation formula and one or more observations or the occurrence of certain events in relation with the Underlying(s). If there is an adverse change in the price, value or level of the Underlying, exacerbated, if relevant, by the terms of the above-mentioned formula or indexation provisions, investors may suffer a significantly decreased rate of return on the Notes or even no return whatsoever.

Underlying dedicated risk factors

(Risks associated with Notes whose amounts are linked to or make reference to a "benchmark") The indices that are considered as "benchmarks" are governed by regulatory guidelines and reform proposals at national and international levels. Ongoing reforms could have effects on the continuation of some benchmarks, which may not be maintained. Such changes could have a material adverse effect on the value and the amounts due in respect of Notes whose amounts are linked to or make reference to that particular benchmark.

(Risks relating to the determination of an occurrence of a Benchmark Trigger Event) There is a risk that, upon the determination by the Calculation Agent, that an event with respect to the benchmarks or the administrator of the benchmark occurs with the effect that either the Issuer, the Calculation Agent, [the Guarantor] or any other entity is not, or will not be, permitted under any applicable law or regulation to use the benchmark or to perform its or their respective obligations under the Notes (each a Benchmark Trigger Event). Noteholders should be aware that a change (whether or not material) to the definition, methodology or formula for a relevant benchmark, or other means of calculating such relevant benchmark will not, in itself, constitute a Benchmark Trigger Event. Each noteholder will bear the risks arising from any such change and will not be entitled to any form of compensation as a result of any such change. The above described elements may affect Natixis' ability to perform its obligations under the Notes and/or may have a negative impact on the value or liquidity of the Notes.

(Risks relating to the consequences of an occurrence of a Benchmark Trigger Event) If the Calculation Agent determines that an Benchmark Trigger Event has occurred, it may, at its discretion, either adjust certain terms of the Notes, or replace the Underlying or require the Issuer to redeem the Notes at the early redemption amount equal to the fair market value of the Notes as determined by the Calculation Agent at its sole discretion. The adjustment of the terms of the Notes may have a material adverse effect on the value and the amounts due in respect of the Notes. Moreover, such fair market value may be less than the redemption amount initially set out in the terms of the Notes and consequently noteholders may lose all or some of their investment.
